Subject index

adrenal steroid output; pro-opiomelanocortin, inhibition by, 63
adrenocorticotrophin; fetal pituitary localization, 397
adrenocorticotrophin, plasma
  crf and, in fetal sheep, 329
  fetal, crf and, 259
  lung maturation, and, 105
amniotic fluid; oxytocin and vasopressin, source, 55
anti-trophoblast antibody response; pregnancy, and, 269
asphyxia; fetal responses to, beta-blockers, and, 387
asphyxia fetal
  cardiovascular responses to, 75
  cardiovascular responses, and, 289

beta-blockers; fetal asphyxia, effect on responses to, 387
blood flow; breast, during lactation and, oxytocin, 373
blood volume in pregnancy; renin, plasma and, 99
blood, fetal; oxygen affinity, temperature, and, 299
breathing movements; fetal, indomethacin, and, 217

cardiac nerve, neonate; ventricular effects of, 167
cardiovascular responses
  fetal hypothermia, and, 229
  fetal, asphyxia, and, 289
  fetal, to asphyxia, beta-blockers, and, 387

catecholamines, plasma; fetal hypothermia, and, 229
cerebral blood flow; fetal sheep, indomethacin, and, 217
cerebral metabolic rate; fetal hypoglycaemia, and, 421
cortisol and aldosterone, plasma; fetal, crf administration, and, 259
cortisol, plasma; lung maturation, and, 105
crf, fetal; adrenocorticotrophin, steroids, and, 259
crf, plasma; fetal ACTH responses to, 329

enzyme activity; muscle, reduced use, and, 381
epidermal growth factor; milk, lactation and, 135

fasting; kidney fatty acid oxidation, and, 365
fatty acid
  chain-length changes by placenta, 305
  oxidation, placental, 305
fatty acid oxidation; kidney, perinatal, fasting, and, 365
fetal movement; heart rate changes, and, 47

gastric acid production; fetal sheep, gastrin effects, 195

gastrin
  gastric acid production in, fetus, and, 195
  plasma levels in fetus, 195
  liver of fetal sheep and, 177, 185
  newborn, triglyceride feeding, and, 37
glucose
  neonatal heart contractility in hypoxia, 229
  placental transport, insulin, and, 251
glucose consumption; newborn, triglyceride feeding, and, 37
glucose consumption, fetal; uterine blood flow, and, 313
growth factors
  fetal, plasma IGF, pituitary control, 405
  milk, premature birth and, 135
growth hormone; fetal muscarinic regulation of output, 411
growth hormone secretion; fetal, hypothalamic lesions and, 25
growth retardation
  amniotic vasopressin and oxytocin, and, 89
  fetal, placental transport, and, 427
growth, fetal; reduced placental size, and, 427

heart contractility; neonatal, hypoxia, and, 229
heart rate; fetal, movements, and, 281
heart rate changes; fetal, skeletal muscle activity, and, 47
heart rate, fetal; asphyxia, and, 75
heart, embryonic; Ca and Na channel development, and, 355
hydroxymethylglutaryl-CoA synthetase; neonatal liver, maternal diet and, 119
hypoglycaemia; fetal, cerebral metabolic rate, and, 421
hypothalamus; fetal, control of GH secretion, 25
hypothermia; fetal, responses to, 241
hypoxia
  neonatal, heart contractility, and, 229
  placental responses in culture, 113

insulin
  placental transport of glucose, and, 251
  release, pancreatic, lactation, and, 17
insulin-like growth factors, plasma; fetal, pituitary control, 405
ion channels; heart, development of in chick embryo, 355
iron transport; placental, 1

kidney, fetal; maternal water resitriction, and, 161
kidney, perinatal; fatty acid oxidation, fasting and, 365

lactate metabolism; liver of fetal sheep and, 177
lactation
  breast blood velocity, and, 373
  pancreatic insulin, and, 17
lipid metabolism
  fetal liver, maternal stress, and, 339
  neonatal liver, maternal diet and, 119
liver, fetal; maternal stress, and, 339
liver, fetal sheep
  gluconeogenesis and, 185
  lactate uptake by, 177
lung distention, fetal; adrenocorticotrophin, cortisol, and, 105

lung fetal; expansion, effects of, 149
lung maturation, fetal; adrenocorticotrophin, cortisol and, 105
lung, fetal
  Na and Cl production by, 149
  liquid production by, 149

maternal diet; neonatal liver metabolism and, 119
medium-chain triglycerides; neonatal glucose homeostasis, and, 37
milk, human; growth factors in, 135
movements, fetal; heart rate, and, 281
muscarinic receptors; fetal, control of growth, hormone output, 411
muscle; enzyme development, reduced activity, and, 381

oxygen affinity; blood, fetal, temperature, and, 299
oxytocin
  amniotic, source of, 55
  breast blood velocity, and, 373
oxytocin, amniotic; growth retardation, and, 89

pancreatic B-cell; ultrastructure, lactation, and, 17
pituitary
  fetal, ACTH localization, 397
  fetal, IGF's, and, 405
placenta
  iron transport, and, 1
  lipid metabolism by, 305
placenta, transport
  3-O-methylglucose, insulin, and, 229
  fetal growth retardation and, 427
placenta, villi; hypoxia, and, 113
pregnancy
  anti-trophoblast antibodies, and, 269
  psychosomatic stress and fetal lipids, 339
pro-opiomelanocortin; inhibition of fetal steroid production, 63
prostaglandin synthesis inhibition; cerebral blood flow and breathing, fetal, 217

renin, fetal plasma; maternal water restriction, and, 161
renin, plasma; blood volume in pregnancy, and, 99

skeletal muscle activity; fetal, heart rate changes, and, 47
somatomedin, plasma; weaning in Brattleboro rats, and, 321
stellate ganglion, neonate; cardiac effects of, 167

thyrotrophic hormone
  plasma of fetal rat, 207
  thyroid of fetus, effects on, 207
thyroxine; plasma levels of fetal rat, 207
transcutaneous PO_2; asphyxia in fetus, and, 75
transferrin; placental binding and uptake, 1

umbilical blood flow; asphyxia, fetal, and, 289
urine, fetal; maternal water intake, and, 161
uterine blood flow
  fetal oxygen uptake, and, 313
  glucose consumption by fetus, and, 313

uterine blood flow; reduced, fetal effects of, 289

vasopressin; amniotic, source of, 55
vasopressin, amniotic; growth retardation and, 89
ventricular fibrillation, neonate; cardiac nerve stimulation and, 167

weaning; somatomedins and in Brattleboro rats, 321
